RESEARCH INTERESTS

I am interested in understanding the role of Social Media during mass convergence events by using big data analysis techniques such as text classification, data mining, and interactive machine learning, and to use social media data streams to develop novel solutions and technologies to help stakeholders gain situation awareness and to improve their decision making processes.

Keywords: *Social Computing, Crisis Informatics, Crowdsourcing, Web Engineering*

EDUCATION

Ph.D. Computer Science

November 2009 – March 2013

University of Trento, Trento, Italy.

Concentration: Computer Science

M.Sc. Computer Science

September 2005 – September 2007

Mohammad Ali Jinnah University, Islamabad, Pakistan.

Concentration: Computer Science

B.S. Computer Science

January 2000 – December 2003

Allama Iqbal Open University, Islamabad, Pakistan.

Concentration: Computer Science

HONORS & AWARDS

- **Best Paper Award:** at the 10th International Conference on Information Systems for Crisis Response and Management (ISCRAM) in 2013, Baden-Baden, Germany.

- **Recipient of Scholarship:** the Opera Universitaria Italy granted for four years (2009-2013) of scholarship to my pursue PhD studies.

- **Distinguished Position:** achieved 1st place in the Master of Science (Computer Science) degree in 2007.

RESEARCH EXPERIENCE

Scientist

December 2014 – Present

Qatar Computing Research Institute, Doha, Qatar

Responsibilities: Focusing on building computational methods and technologies for real-time mining of social media data streams such as Twitter data stream using hybrid approaches. I study novel ways to combine humans and machines intelligence to solve non-trivial problems. Currently, interested in providing solutions and technologies to help stakeholders gain situational awareness and actionable information during mass convergence events using social media data.

Post-doctoral Researcher

April 2013 – December 2014

Qatar Computing Research Institute, Doha, Qatar

Responsibilities: Conducted research on the application of Social Media mining methods to problems in the humanitarian crises. Humanitarian crisis computing seeks to rapidly identify situational awareness, actionable and tactical information in the big crisis data available on Social Media. Currently, leading research and technical directions of AIDR (Artificial Intelligence for Disaster Response) project. The focus of this applied research project is to use Social Media microblogging platforms like Twitter during mass convergence events and humanitarian crises in an effort to mine and classify information that can help stakeholders gain situation awareness and in their decision making processes.

Research Associate

June 2012 – September 2012

Qatar Computing Research Institute, Doha, Qatar

Responsibilities: Mainly worked on two different research projects. The first project focused on real-time analysis of Social Media platforms such as Twitter, to predict life span of NEWS articles. Analysis of various parameters associated with articles like social media exposure in terms of their spread, first few hours visits, discussion was conducted using time-series analysis techniques. The second project focused on classification and extraction of useful information using machine learning techniques from disaster-related messages posted on Twitter to assist stakeholders in disaster response.

PhD Candidate

November 2009 – March 2013

University of Trento, Trento, Italy

Responsibilities: Worked on the research direction of end-user development. EUD research tries to bring programming closer to the needs of end users. My PhD dissertation introduced the concept of Domain-Specific Mashups in which Web 2.0 technologies were employed to empower and enable non-programmers, non-technical users to develop ad-hoc and situational applications to perform complex data aggregation, processing and analysis tasks.

TECHNICAL EXPERIENCE

Database Administrator

July 2007 – August 2008

National University of Science & Technology (NUST), Islamabad, Pakistan

Responsibilities: I was responsible for the installation, configuration, upgrading, administration, monitoring, maintenance, and security of Oracle database systems. Moreover, performance tuning, query execution, tuning execution plans, were among other important responsibilities.

Java Developer (Intern)

February 2009 – May 2009

OKKAM, Trento, Italy

Responsibilities: Assisted OKKAM research team to analyze big log files of different servers to investigate how complex operations execute and behave under different circumstances. For example, this includes checking how much time a search query

took to find an entity in the OKKAM entities database, or why certain part of a query failed.

PROFESSIONAL - Track Co-chair:

ACTIVITIES

- International Conference on Information Systems for Crisis Response and Management (ISCRAM 2015).

- Program committee member:

- International Conference on Digital Health (DL 2015).
- International Workshop on Social Web for Disaster Management (SWDM 2015).
- International Conference on Information Systems for Crisis Response and Management-Mediterranean (ISCRAM-Med 2014, 2015).
- Workshop on Standards and Practices in Large-Scale Social Media Research (2015).
- International Conference on Emerging Technologies (ICET 2014).
- Computational Social Science Winter Symposium (CSSWS 2014).

- Reviewer:

- Computer Networks Journal (2014).
- International Conference on Web Information System Engineering (WISE 2014).
- International Conference on Information Systems for Crisis Response and Management (ISCRAM 2014, 2015).
- ACM Web Science Conference (WebSci 2014).
- International Conference on Web Engineering (ICWE 2012).

- Invited talks:

- Machine Learning and Data Analytics Symposium (MLDA 2014).

- Professional member:

- Association for Computing Machinery (ACM) professional member (since 2012).
- ISCRAM community professional member (since 2012).

**TEACHING
EXPERIENCE**

- Service-Oriented Architecture and Applications – course held by Prof. Maurizio Marchese at the University of Trento, 2010 – 2011.
- Laboratory for Service Design and Engineering – course held by Prof. Maurizio Marchese at the University of Trento, 2011 – 2012.

MENTORING

Following are the students that I co-mentored:

- Michele Lunelli (2010)
 - Level: Master (Laurea Magistrale) at the University of Trento
 - Co-mentor: Prof. Maurizio Marchese
 - Topic: Implementation of web crawlers for Google Scholar and Microsoft Academic to extract scholarly data and scholarly metrics (h-index, g-index).
- Felix Kling (2011)
 - Level: Master (Laurea Magistrale) at the University of Trento
 - Co-mentor: Prof. Maurizio Marchese
 - Topic: Implementation of the front-end of ResEval Mash project using JavaScript libraries.
- Massimo Pacher (2011)
 - Level: Master (Laurea Magistrale) at the University of Trento
 - Co-mentor: Prof. Fabio Casati

- Topic: Implementation of the scholarly metrics for group of people such as research groups at a university or a research lab.

- Simone Dalcastagne (2011)
 - Level: Master (Laurea Magistrale) at the University of Trento
 - Co-mentor: Prof. Fabio Casati
 - Topic: Implementation of self-citation count and other scholarly group metrics (e.g. group h-index).
- Matteo Bertoni (2013)
 - Level: Master (Laurea Magistrale) at the University of Trento
 - Co-mentor: Prof. Maurizio Marchese
 - Topic: Implementation of visualization components for the ResEval Mash project.

CERTIFICATIONS • **Oracle Certified Professional (OCP)**
Track: Database Administration
California, USA

**TECHNICAL
SKILLS**

- **Programming:**
 - JAVA— SE, EE, EJBs (expert level)
 - Web Services (RESTFul, SOAP), Hibernate, SAX, JAXB (expert level)
 - Microsoft .NET Framework using C#, ASP.NET and ADO.Net (advance level)
 - Weka: Data Mining Software (advance level)
 - Python (beginner level)
- **Databases:**
 - Oracle 9i, 10g, 11g (expert level)
 - MySQL, MS-SQL Server (advance level)
 - Redis (expert level)
- **Misc. expertise:**
 - Good hands on knowledge of OOPS (Object Oriented Programming Structure) and Agile methodology.
 - Experience designing and/or developing solutions for a Service Oriented Architecture (SOA).
 - Sound knowledge of 3-tier and N-tier layered architecture, and design patterns like Singleton, Factory and MVC.
 - Experience using tools such as NetBeans, Eclipse, Visual Studio.Net.
 - Experience using technologies such as Maven, BaseCamp, Pivotal Tracker, GIT.
